Reduce Paper Work

Modules

Patient Management

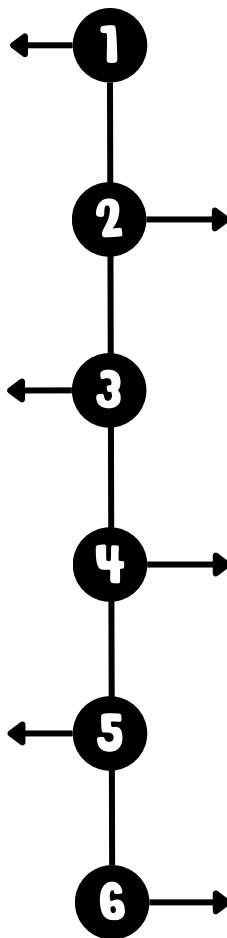

Streamlines patient registration, appointment scheduling, electronic medical records, billing, and follow-up care to enhance hospital efficiency and improve patient experience.

Inpatient Management

Manages patient admissions, bed allocation, treatment plans, and discharge processes to ensure seamless and high-quality inpatient care

Pharmacy Management

Manages medication inventory, prescription processing, and dispensation to ensure accurate and efficient pharmaceutical services.

Doctor and Staff Management

Manages schedules, performance, credentials, and communication for all hospital staff to ensure optimal staffing and efficient hospital operations.

Billing and Financial Management

Automates billing, invoicing, and insurance claims to ensure accurate financial operations and streamlined payment processing

Radiology Management

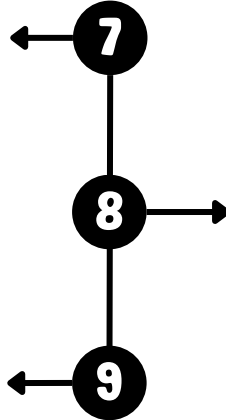

Streamlines imaging requests, results reporting, and image storage to facilitate efficient radiological services

Inventory and Supply Chain Management

Optimizes inventory levels, procurement processes, and supplier relationships to ensure seamless supply chain operations.

Canteen Facility Management

Facilitates efficient management of canteen operations, including menu planning, inventory tracking, and billing, to meet the dietary needs of patients and staff.

Administration & Monitoring Management

Centralizes administrative tasks and monitors system performance to ensure smooth hospital management and operational efficiency.
